PROFESSIONAL SUMMARY

Product leader with 7 years of experience owning end-to-end consumer product journeys at NAB, with a consistent focus on funnel conversion, customer acquisition and digital experience optimisation. Proven ability to navigate complex, regulated environments while shipping at pace across cross-functional squads. Comfortable operating across both B2B partner tooling and B2C consumer experiences. Background in data-led experimentation, hypothesis validation and roadmap prioritisation in resource-constrained settings. MSc Biotechnology grounds an instinct for evidence-based decision making. SAFe POPM certified. Actively using AI tooling (Claude, Claude Code) in day-to-day workflow to move fast across research, analysis and outputs.

PROFESSIONAL EXPERIENCE

Program Analyst Lead | May 2026 - September 2026

Accelerer

Played key role in establishing a new PMO as part of the integration between efm and AFS, leading planning and reporting infrastructure across a large transformation program.

- o **Built portfolio delivery management system from the ground up in Asana** - custom fields, RAG/risk-scoring logic and automation rules — giving leadership a live, auditable view across the entirety of the transformation workstreams in place of static spreadsheets.
- o **Designed and ran recurring C-Suite reporting cadence** (a concise “postcard” format) translating workstream progress into clear, executive-ready updates.
- o **Authored a business case proposing a new AI & Agentic Workforce Product Owner function**, identifying where agentic tooling could absorb operational load across the transformation program.
- o **Built financial and personnel cost models to support the org restructure**, giving leadership a clear view of cost and headcount scenarios to inform structural decisions.
- o **Contributed to target operating model design**, working alongside PMO leadership to shape how the merged organisation's processes, roles and reporting lines should function post-integration.

Senior Product Owner | May 2023 - March 2026

NAB

Led cross-functional squads owning NAB's consumer deposit origination platform — responsible for acquisition funnel performance, marketplace-style supply-demand dynamics across customer segments, and end-to-end digital journeys.

- o **Drove conversion improvement across the acquisition funnel** by collaborating across design, engineering, risk, and legal to continuously reduce drop-off — including A/B experimentation on segment-specific landing page entry points that improved year-on-year conversion rates.
- o **Expanded addressable market through a data-led eligibility change** — working through alongside Risk, Legal and senior leadership to lay out a distinct roadmap for further expansion as infrastructure allowed — generated 2,000+ opens in the first week post-launch.
- o **Spearheaded migration off legacy origination infrastructure to target state architecture**, ensuring regulatory compliance while laying the foundation for scalable, high-velocity product delivery.
- o **Managed and prioritised an extensive product roadmap** balancing short-term conversion wins, regulatory requirements, and longer-term capability bets — consistently choosing high-leverage problems to move core acquisition metrics.

Product Owner | Feb 2021 - May 2023

NAB

Squad Product Owner responsible for NAB Broker and Advantedge commission engines — owning B2B partner-facing product experiences for a large external broker network.

- **Delivered partner-critical functionality under time pressure** — partnered with external broker network stakeholders to reintroduce Subsequent Drawdown payments in compliance with new legislation, managing partner relationships and cross-functional delivery simultaneously.
- **Owned delivery of NAB's target state commission engine**, replacing a legacy platform while maintaining supply reliability for broker partners throughout transition.
- **Improved operational efficiency** by identifying and eliminating manual processes for broker operation teams — reducing colleague effort, improving throughput, and increasing partner satisfaction.

Product Analyst | Jul 2019 - Feb 2021

NAB

Supported product owners and managers across the home lending portfolio, developing deep familiarity with the end-to-end home loan origination and servicing lifecycle.

- **Collaborated with product owners, business analysts and end users** to shape feature requirements and validate solutions against customer and business outcomes.
- **Supported change communications and squad verification testing for key lending enhancements**, ensuring delivery quality and stakeholder alignment across complex releases.

Service Advisor | May 2017 - Jul 2019

NAB

Delivered frontline service across NAB's direct consumer banking channel.

- **Built deep customer empathy and operational knowledge** that directly informs product decision-making — understanding where friction hides in everyday banking journeys.

EDUCATION

Master of Science (Biotechnology) | University of Melbourne, 2016

Bachelor of Science (Honours) | Victoria University, 2015

Bachelor of Science | University of Melbourne, 2011-2014

TOOLS & TECHNOLOGIES

Adobe Analytics | Jira | Confluence | Figma | Rally | Claude/Claude Code | Asana

CORE SKILLS

Product Strategy & Roadmap Ownership
Product Discovery & Hypothesis Validation
Experimentations & A/B Testing
Stakeholder Management & Executive Communication
Regulatory & Compliance Navigation
AI Accelerated Workflow Design
Customer Acquisition & Funnel Optimisation
User Research & Usability Testing
Lean & Agile Delivery
Data Visualisation & Data-Driven Decision Making
Cross-Functional Leadership

ABOUT ME

I thrive in complex scenarios where strategic thinking and adaptability help me navigate challenges and drive meaningful change — whether that's tackling intricate product decisions, uncovering the next hidden gem in one of my fantasy sports leagues or working out how to slice through an opposition low block whilst coaching on the soccer sideline. I enjoy breaking down problems and optimising outcomes and bring that same energy to building products that genuinely engage the people who use them.
